

COMFORT AND SKIN PROTECTION IN A TILT-IN-SPACE WHEELCHAIR

Longer compartments to fit into tilt-in-space chairs | follow the body's contours for equal pressure distribution | support IT-coccyx area | managing pelvic asymmetry

Pre-ischial bar limits sliding forward | converts shear into normal forces

Thigh support

- ▲ Ideal for use in tilt-in-space chair with adjustable seat depth
- ▲ Vicair Adjuster O2 design with deeper rear end compartments
- ▲ Optimal adjustment to the body's contours for equal pressure distribution

The Vicair Multifunctional O2 consists of 5 individual compartments, designed to contour under loading. The cushion features a special 8 cm thick design with elongated rear end compartments for optimal use in tilt-in-space wheelchairs. 8 cm thickness is thick enough to protect the skin and low enough for optimal accessibility under tables, counter tops, desks etc. Each compartment is designed to influence a specific area of the pelvis, striking a unique balance between preserving skin and underlying tissue at the ischials, coccyx and trochanters, positioning the pelvis and supporting the femurs. For specific needs the filling of each of the 5 compartments can be easily adjusted, allowing you to change the density of each compartment.

AVAILABLE COVERS
Vicair O2 Top Cover, Comfair Cover and Incotec Cover.
